Chairman's Review

The Newcastle Iron Recovery Plant at Kooragang Island, Newcastle, has progressed during the year with construction on the northern extension of the multi-level process tower, as well as initial commissioning of some components of the Plant. Expenditure during the year totalled $2.5 million as the Plant moves toward completion.

During the September 2013 quarter, the iron oxide solids preparation section was completed and commissioning commenced using fine mill scale from a steel mill, and by December 2013 this section was operating. In late 2013, modifications were made to the mill scale preparation section to enable the Plant to handle very fine material such as the waste iron oxide dusts produced by furnaces during the iron and steel making processes. Closed chutes and hoppers, covers for the conveyors and a cover over the trommel were installed to minimize dust emissions and protect the mill scale and fine dusts from wind and rain, improving this section's operability.

During the year, steel beams were fabricated and installed in the process tower by Austpac personnel. This included additional support for the stoves which will be used for heat recovery in Level 6, and beams to support the two large gasification and metallisation fluid bed roasters for iron oxide reduction Level 9. Six screw feeders to transfer iron pellets and other solids were fabricated and delivered ready for installation in the briquetting area of the Plant. Compressors were connected to the electrical supply and high pressure air lines were run to the process tower to facilitate construction and commissioning operations. The pilot scale facility used to test the suitability of raw materials as feed for the EARS acid regeneration and iron reduction processes was also significantly upgraded during the year.

In December 2013, Austpac signed an agreement with BlueScope Steel, Australia's largest steel producer, to undertake a bulk trial to recover iron from waste iron oxide-rich furnace dusts. During the first half of 2014, using the upgraded pilot scale facility, Austpac demonstrated that zinc-free iron can be produced from this material. During the latter part of the Plant's commissioning, Austpac will process 1,000 tonnes of furnace dust, together with sufficient pickle liquor, to produce iron briquettes, hydrochloric acid and other by-products. BlueScope has agreed to purchase the iron briquettes and plans to trial them at their Port Kembla steel-making facility.

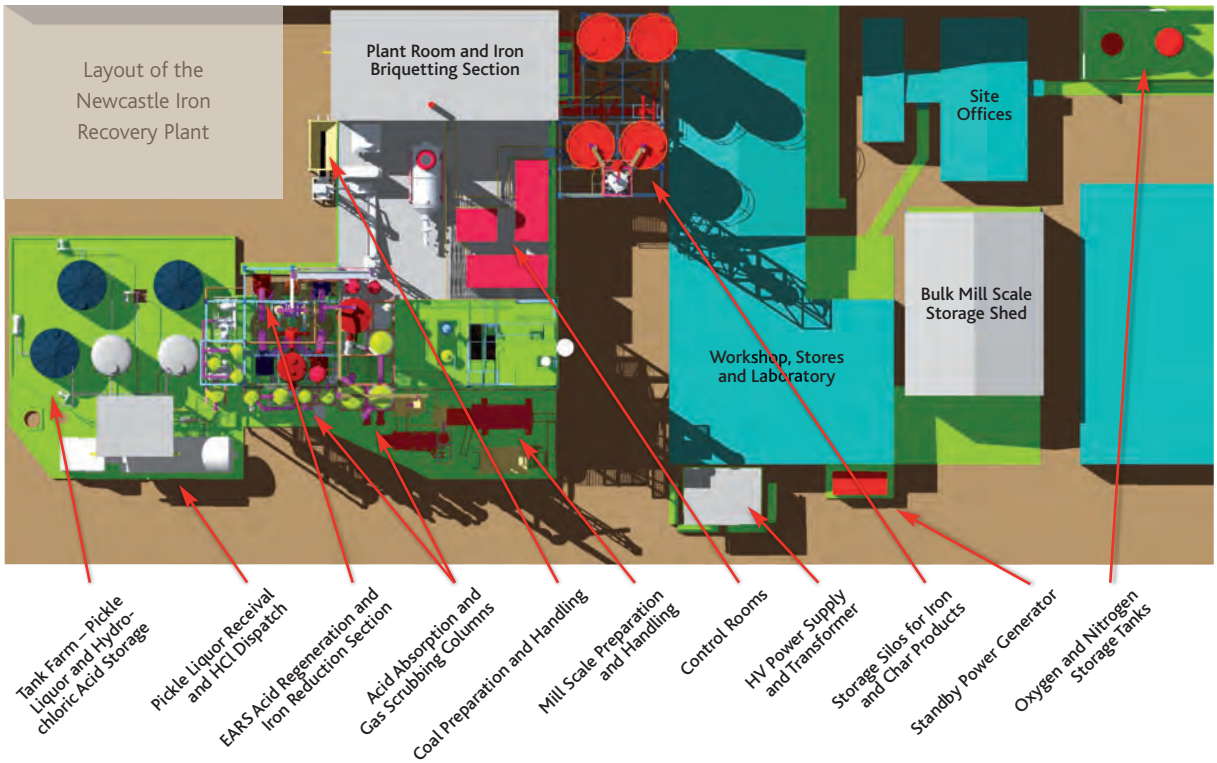
Austpac is in advanced negotiations with a multinational corporation for the project capital required to complete and commission the Newcastle Iron Recovery Plant.

An independent valuation of the Austpac suite of technologies completed in September 2013 valued the technologies in commercial settings at between $131 million and $161 million.

Austpac undertook three private placements of shares to professional investors during the 2013-14 financial year, which raised a total of $$2,676,000 for working capital and the continuing development of the Newcastle Iron Recovery Plant.

We look forward to commercial operations of the Newcastle Iron Recovery Plant in 2015.

T Cuthbertson
Chairman



Directors' Report on Operations

HIGHLIGHTS

- In 2015 the Newcastle Iron Recovery Plant (NIRP) will showcase Austpac's proprietary waste recycling technologies to the steel industry.
- Construction and commissioning of the Plant continued throughout the year, resulting in the following achievements:
  - Construction of the northern extension of the process tower continued during the year. This included installation of additional support beams for the stoves in Level 6, and support beams for the two large gasification and metallisation fluid bed roasters in Level 9.
  - The compressor in the plant services room was connected to the electrical supply and high pressure air lines were run to the process tower to facilitate ongoing operations.
  - Six screw feeders for solids transfer from the silos and the briquetting area were delivered to the Plant and tested ready for installation.
  - Mill scale that was progressively delivered and stored in the covered and bunded concrete bunker is being used to commission the Plant.
  - Commissioning of the mill scale/iron oxide preparation section was completed in December 2013. Modifications were also made to this section to enable the Plant to process very fine material.
- The iron recovery pilot scale facility at the Plant was expanded and upgraded. The new equipment facilitates the testing of a wide variety of steel mill wastes and spent chloride liquors for suitability as feed.
- An application for a new patent was lodged early in 2014 to protect Austpac's iron reduction process.
- In December 2013, BlueScope Steel (AIS) Pty Ltd (BlueScope) agreed with Austpac to undertake a bulk trial at the NIRP to recover iron from the waste iron oxide dusts produced by the furnaces during steel-making operations at BlueScope Steel's Port Kembla facilities. This will be undertaken during the final phase of commissioning the Plant. After the trial has been completed, BlueScope has the right to negotiate licences to use the Company's recycling technologies at their steel mills.
- During the first half of 2014 in accordance with the agreement, Austpac undertook testwork on a blend of furnace dusts and spent pickle liquor provided by BlueScope. The work, which was undertaken in the upgraded pilot scale facility, produced a zinc-free iron product and hydrochloric acid, and also provided operating parameters for the bulk trial at the Plant.
- Austpac is at an advanced stage of negotiations with a major international company to provide project funding to complete construction, equipment installation, commissioning and initial production at the Newcastle Iron Recovery Plant.
- A major international diversified engineering, technology and equipment provider is evaluating the potential of Austpac's processes to add value to some of their businesses.
- Exploration momentum is building along the Mount Stavely Volcanic Belt in western Victoria, as companies and Government agencies undertake drilling campaigns, endorsing Austpac's exploration program at Nhill. Within EL 5291, two vertical holes were drilled through the overlying Murray Basin sediments to obtain samples from the basement. Intensely altered mafic volcanics were encountered indicating the holes may be close to a hydrothermal alteration centre. Further drilling is required to test this target.

BACKGROUND TO AUSTPAC'S TECHNOLOGIES

In the late 1980s, Austpac commenced a research program into the beneficiation of ilmenite. This work was initially undertaken in facilities at the Chemical Engineering Department of the University of Newcastle, but due to space limitations, in the mid-1990s the Company's equipment and personnel moved to a larger site on Kooragang Island. Since that time Austpac has developed a suite of technologies that have applications in the titanium and steel industries, some of which are unique and have been patented. These technologies and their inter-relationships are shown in the diagram below.

The fully continuous ERMS SR process uses Austpac's roasting, continuous leaching, acid regeneration and iron reduction technologies to separate the titanium and iron components of ilmenite and produce very high grade synthetic rutile and a saleable iron co-product. Other synrutile processes produce waste iron oxide sludge or dust. The synrutile contains over 97% titanium dioxide (TiO_2) making it a premium feedstock for plants producing TiO_2 pigment (by the chloride process) or titanium sponge, the precursor to titanium metal. The process was incorporated in the ERMS SR Demonstration Plant built at Newcastle in 2007–08.

In 2009, recognising that the EARS acid regeneration and the direct reduction processes could be used to recycle wastes from the steel industry, a decision was made to enlarge and rebuild the relevant sections of the ERMS SR Demonstration Plant to commercially demonstrate these technologies. This facility is called the Newcastle Iron Recovery Plant (NIRP), which is fully described later in this report. In 2011, significant funding was obtained and construction commenced and has continued, subject to available funds, through 2014.

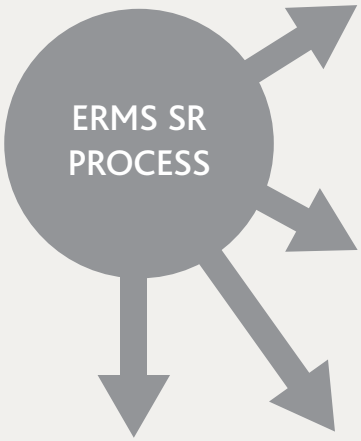
AUSTPAC'S TECHNOLOGIES

ERMS ROAST

A high temperature roasting process to strongly enhance the magnetic susceptibility of ilmenite so it can be separated from other minerals. ERMS-roasted ilmenite is ideal for titania slag production but is unsuitable for the sulfate pigment process.

LTR ROAST

A low temperature roasting process to slightly increase the magnetic susceptibility of ilmenite so it can be separated from other minerals. LTR-roasted ilmenite is suitable for the sulfate pigment process.



ERMS SR ROAST

An oxidation/reduction roast to condition ilmenite for rapid leaching in hydrochloric acid to produce high grade synrutile.

CLR

A patented reactor to continuously leach roasted ilmenite to produce synrutile. All other synrutile processes use less efficient batch leaching.

IRON REDUCTION

A proprietary DRI process to reduce the iron oxide pellets produced by Austpac's EARS acid regeneration process to iron metal.

EARS

Acid regeneration process to produce strong hydrochloric acid and iron oxide pellets from waste iron chloride leach and pickle liquors.

NEWCASTLE IRON RECOVERY PLANT

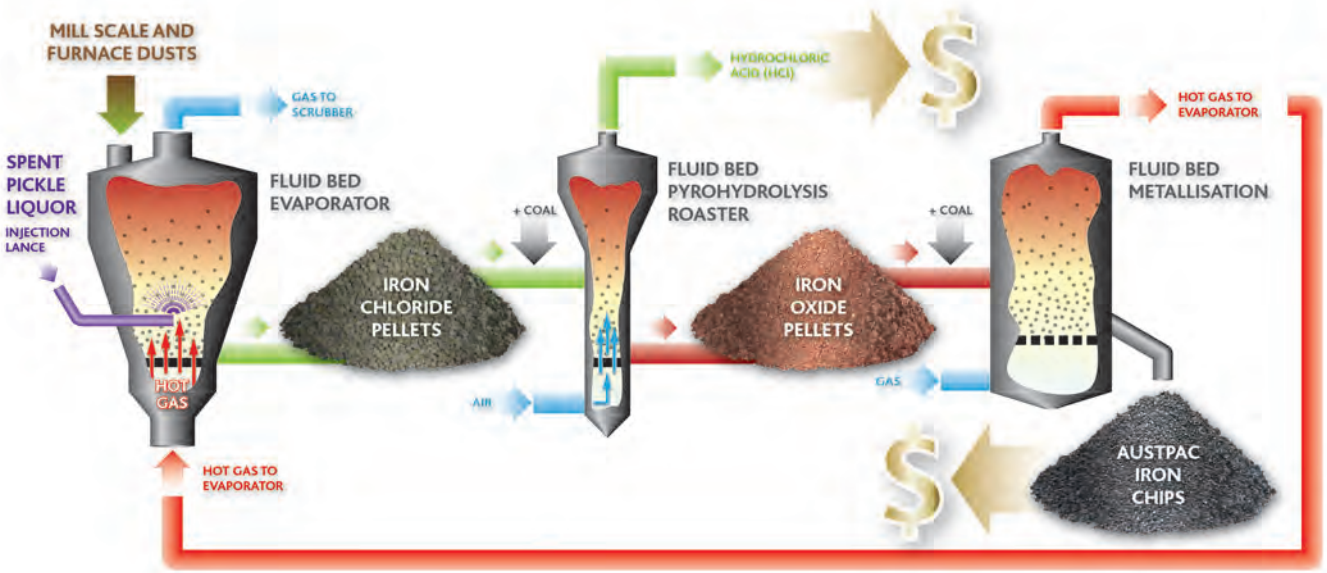
CLR = *Continuous Leach Reactor*
DRI = *Direct Reduced Iron*

THE NEWCASTLE IRON RECOVERY PLANT

AUSTPAC'S IRON RECOVERY PROCESS



Since 2011, Austpac's focus has been the Newcastle Iron Recovery Plant, which is a facility that will utilise the Company's EARS acid regeneration and iron reduction processes to recycle by-products from steel mill operations. These include mill scale, waste iron oxide-rich furnace dusts, and spent pickle liquor (iron chloride), which are made into iron chips or briquettes and strong hydrochloric acid for sale to industry. The project commenced in 2011 and construction has continued through 2013 and 2014.

Progress with Construction of the Newcastle Iron Recovery Plant

During the previous year, substantial construction progress resulted in sections of the Plant nearing completion and being readied for commissioning. This included the bulk mill scale storage shed, all site civil works, the Plant services room and the iron briquette load-out bunker, the mill scale/iron oxide solids preparation area, the high voltage switch room near the 33kVA switchyard and its connection via underground cable to a 2,000A, 33kVA transformer installed in a bunded fireproof structure adjacent to the Plant.

Installation of the equipment for the iron oxide preparation section was completed in August 2013 and the section had been commissioned by the December quarter of 2013. The main focus of construction was the northern extension of the process tower, together with stairways, walkways and safety barriers in the Plant.

The Iron Oxide Solids Preparation Section

The iron oxide solids preparation section was originally designed to handle coarse mill scale and incorporated a ball mill to homogenise the size of the iron oxide solids that would be fed to the Plant. During the September quarter of 2013, the iron oxide solids preparation section was completed. As coarse mill scale was not available at that time, commissioning commenced using fine mill scale delivered in bulk bags from a steel mill. Commissioning continued into the December quarter, by which time the iron solids section was shown to be capable of processing solids at a rate well in excess of the 3–4 tonnes per hour design capacity of the Plant.

Stacking bags of fine mill scale the in the mill scale/iron oxide solids bulk storage shed

Conveying mill scale into the trommel at the start of commissioning to remove oversize material

Olds vertical elevators are used to transfer mill scale into the Plant

Modifications included installing covers for weather protection and dust suppression

In late 2013, modifications were made to the iron solids preparation section to enable the Plant to handle very fine material such as the waste dusts produced by furnaces during the iron and steel making processes. Closed chutes and hoppers, covers for the conveyors and a cover over the trommel were installed to minimize dust emissions and protect the mill scale and fine dusts from the elements. This improved this section's operability and flexibility so that the Plant is able to process all types of iron oxide dusts.

The Northern Extension to the Process Tower

Construction of the extension to the north of the process tower at Newcastle commenced during the previous year and continued during the year under review with fabrication and installation of steel beams and other steelwork. The extension houses the main process units of the Plant; namely the EARS acid regeneration and iron reduction/ metallisation equipment. This comprises four fluid beds for evaporation/pelletisation, pyrohydrolysis, gasification and iron reduction, two stoves for heat recovery, and ancillary pumps and gas compressors. The acid absorption and gas scrubbing columns will be installed on the external walls adjacent to the fluid beds.

Preparing steel beams for painting in the sandblasting booth

Painted support beams prior to installation in Level 6 of the process tower

Work at the Plant early in 2014 included the in-house fabrication of support beams for the northern extension to the process tower. To expedite this work, a shipping container was modified for use as a sandblasting and painting booth, because the steelwork required a special epoxy acid-resistant coating.

During the March quarter of 2014, eight additional beams were installed in Level 6 of the tower to support the two refractory-filled stoves which will be used for heat recovery.

Preparing to install the support beams for Level 6 of the process tower

Completed installation of Level 6 support beams

During March 2014, fabrication of six solid screw feeders was completed and they were delivered to the Plant. Four will be used to discharge solids from product and raw material silos that were installed adjacent to the iron briquetting area in 2013 and two will be used to blend and convey iron pellets and binding material to the briquetter.

Three of the six screw feeders for solids transfer

During the June quarter of 2014, steel support beams were also installed in Level 9 of the tower to support the two large gasification and metallisation fluid bed roasters for iron oxide reduction. High temperature tuyeres for these roasters will be installed in a refractory-lined plenum (the lower part of a fluid bed vessel that distributes fluidising gases into the bed of solids). When complete, the plenums will be secured to the upper bodies of the fluid beds prior to their installation in the Tower.

Detail of the support beams and cross members in Level 9 of the process tower

The additional steelwork ensures the structure will adequately support the iron reduction fluid beds, which will have a significant dynamic load when operational and filled with fluidised iron pellets.

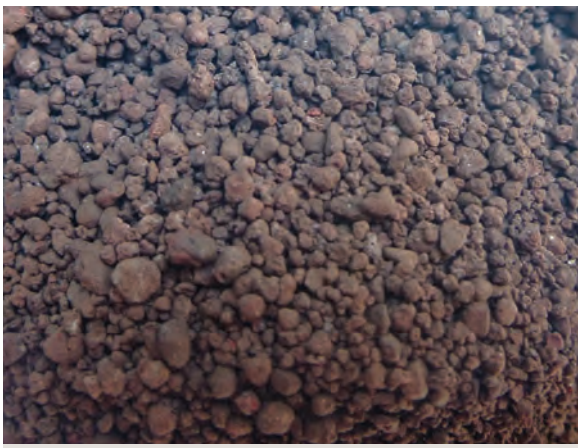
The Pilot Scale Facility and Furnace Dust Processing

During the past four years, Austpac has processed a wide variety of iron oxide raw materials using the Company's pilot scale equipment at Newcastle, and has confirmed that several of the iron products are highly suitable for use in specialty sectors of the steel industry. The facility was expanded and upgraded during the year under review to handle very fine iron oxide dusts.

The new equipment is designed to duplicate the processes being undertaken in the NIRP. This includes an initial step of evaporation/pelletisation of fine iron oxide dust and spent pickle liquor. The main modification was the installation of equipment to prepare and feed a slurry of fine dust and pickle liquor into the fluid bed evaporator.

The fluid bed evaporator being prepared for operation

The mixed iron oxide/iron chloride pellets are then transferred to a fluid bed roaster to produce iron oxide pellets and hydrochloric acid gas and the regenerated strong acid is captured by a scrubber. The iron oxide pellets are then transferred to and reduced in Austpac's proprietary gasifier/reduction roaster to produce iron pellets or chips, completing the three process steps.



Iron oxide/iron chloride pellets from evaporation stage

Iron oxide pellets from pyrohydrolysis stage

Iron metal pellets from metallisation stage

Austpac's unique pilot scale facility has handled a wide variety of steel mill wastes, and work during the year included successfully processing fine mill scale and furnace dusts to verify they are suitable as feed for the Plant. The upgraded pilot facility allowed preliminary scoping of furnace dusts and spent pickle liquor supplied by BlueScope Steel and confirmatory work is ongoing.

Full scale trials using a 1,000 tonne sample of furnace dust will be undertaken during the commissioning of the Newcastle Iron Recovery Plant.

The venturi scrubber recovers HCl from the batch roaster exit gases

BlueScope engineers observing the fluid bed evaporator producing iron oxide/iron chloride pellets

John Winter explaining the operation of the pilot scale fluid bed roaster to BlueScope engineers

BlueScope Steel Agreement

In December 2013, Austpac announced it had signed an agreement with BlueScope Steel, Australia's largest steel producer, to undertake a bulk trial to recover iron and other by-products from waste iron oxide dusts. This agreement follows extensive laboratory and pilot scale testwork previously undertaken at Newcastle on BlueScope's dusts, which produced samples of high quality iron.

BlueScope will provide a 1,000 tonne sample of dusts collected from the off-gases produced from their steel-making processes, together with sufficient spent pickle liquor, which Austpac will process at the NIRP to produce saleable iron briquettes, hydrochloric acid and other by-products. Austpac will initially use mill scale to commission the NIRP, and BlueScope's dusts will be processed during the latter part of commissioning. BlueScope has agreed to purchase the iron briquettes at appropriate commercial market rates, and plans to trial them at their Port Kembla steel-making facility.

During the first half of 2014, Austpac undertook further test-work in the upgraded pilot scale facility using furnace dust, spent pickle liquor and coal supplied by BlueScope from Port Kembla. The aim of this work was to confirm the previous work with larger samples and to obtain operating parameters for the Plant prior to the bulk trial. The testwork is ongoing and results to date confirm that zinc-free iron was produced together with regenerated acid and by-products.

BlueScope operates steel processing facilities in New South Wales, Victoria and New Zealand. When the trial has been completed, BlueScope has the right to negotiate with Austpac for licences to use the technology at one or more of their plants.

Iron oxide dusts are produced by all steel making facilities and they often contain other minor metals such as zinc, making them difficult to recycle due to accumulation issues. Consequently many facilities around the world have very large stockpiles, some containing millions of tonnes of the waste dust. Austpac's process separates and concentrates these minor metals allowing them to be recovered. BlueScope is the first steelmaker to recognise the potential of, and commit resources to Austpac's recycling technologies. Once the trial is completed, the Company will be well placed to license its technologies to iron and steel plants around the world. Meanwhile, discussions have commenced with international steel producers interested in Austpac's technologies.

New Patent Application, "Direct Reduction"

In early February 2014, Austpac filed a patent application to protect the Company's iron reduction process. Austpac had previously filed several applications to cover earlier iterations of this technology, but it was not until 2013 that the process was perfected at Newcastle. Many direct reduction patents exist, but Austpac's process is unique and patent protection is essential before the NIRP becomes operational and competitors become aware of the potential of our iron reduction process.

Corporate Developments

At the date of this report, Austpac is engaged in negotiations with a major international company involved in the steel industry and is close to finalising project funding to complete construction, equipment installation and commissioning of and initial production at the Newcastle Iron Recovery Plant. It is anticipated this transaction will be completed in the near future allowing initial production to commence during 2015. The parties envisage that the association will lead to an alliance to maximise the benefits generated by commercial operations at the Plant, and they also aim to identify both specialty markets and applications for Austpac's technologies elsewhere in the world.

Austpac has also commenced discussions with a major international diversified engineering, technology and equipment provider which is evaluating Austpac's technologies because of the value the Company's processes could add to some of their businesses.

FUTURE APPLICATIONS FOR AUSTPAC'S TECHNOLOGIES

The Steel Industry

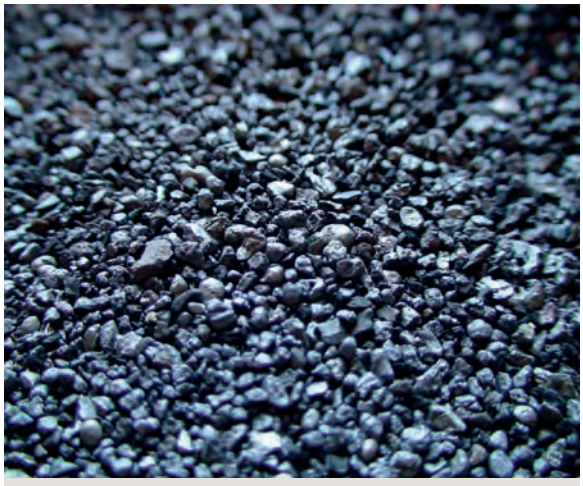
The use of Austpac's technology to recycle mill scale from rolling mills, furnace dusts from mills that use blast and basic oxygen furnaces to produce iron and steel, and spent pickle liquor from steel pickling lines has been described earlier in this report. When operational, the NIRP will not only operate as a commercial undertaking, but will also demonstrate the Company's iron waste recycling technology to steel makers interested in licencing the process.

The NIRP will also be used to trial large samples of other wastes, including the difficult to treat mixed iron and zinc oxide dusts from electric arc furnaces which use steel scrap for feedstock, and also zinc-rich chloride liquors which are produced during galvanizing operations. Successful pilot scale testwork has been undertaken on these materials. Larger scale trials at the Plant will lead to industry recognition of Austpac's highly effective recycling technology, and this will develop into additional commercial opportunities including licences or participation in recycling plants elsewhere.

The Titanium Industry

During 2007–08 Austpac constructed and operated the ERMS SR (synthetic rutile) Demonstration Plant at Newcastle, which not only produced a very high grade synrutile from ilmenite, but also recycled spent leach liquor to produce fresh hydrochloric acid and iron metal. The ERMS SR process is the only synrutile process that produces premium grade synrutile and a saleable iron co-product. Austpac's synrutile is recognised as a desirable feedstock for the production of titanium sponge, an intermediate step in the production of titanium metal.

Once the NIRP is fully operational, the leaching section of the former ERMS SR Demonstration Plant will be used to produce bulk synrutile samples for plant trials, the first stage of an evaluation into the feasibility of establishing a commercial ERMS SR plant. Several titanium sponge producers have indicated an interest in collaborating in such a project, and therefore a synrutile plant to supply feedstock to the titanium metal industry remains an objective of the Company.



Austpac's Direct Reduced Iron

Austpac ERMS SR Synthetic Rutile

EL 5291 NHILL EXPLORATION

In late March 2014, a vertical rotary drillhole CD5 was completed on a magnetic low interpreted to be a strongly altered zone in the basement potentially capping an intrusive body at depth.

The hole penetrated a sequence of marine sediments before encountering the basement at 149 m. The hole continued for another 16 m in basement material until the hardness of the rock precluded further penetration at a total depth of 165 m. Petrology indicates that the chips from the base of the hole comprise intensely altered basalt. The original mineral constituents are completely replaced by fine grained quartz, chlorite and epidote, with fine aggregates of sulphide minerals (pyrite and marcasite, with rare chalcopyrite and bornite). Local areas of hydrothermal brecciation were observed. This strong propylitic alteration is typically found in the outer or upper portion of a porphyry system. Assays from the CD5 rock fragments are low reflecting metal depletion on the ancient land surface beneath the Murray Basin sediments.

Diamond drilling is required at Nhill to test the deep porphyry target identified by work to date.

Mount Stavely Volcanic Complex

The Mount Stavely Volcanic Complex is now the subject of strong exploration interest from both Government agencies and private companies. Geoscience Australia is collaborating with the Geological Survey of Victoria and the Deep Exploration Technologies Cooperative Research Centre in undertaking a substantial program of stratigraphic drilling along east-west transects, which are located both south and north of EL 5291. The objective of this work is to improve the geological understanding of this under-explored region, with its potential for porphyry copper-gold mineralisation. Their results will assist Austpac's program as the Nhill target area falls about half way between two of the transects.

Navarre Minerals Limited announced in June 2014 that it had commenced a 3,000 metre drilling program at its 100%-owned Eclipse porphyry copper-gold prospect.

Also in June 2014, Stavely Minerals Limited provided a positive update on deep drilling at the Stavely porphyry prospect in western Victoria, advising that the hole "is a major step forward in vectoring into what should be the best-developed copper-gold mineralisation in the very large Thursday's Gossan porphyry system".

Schedule of Mining Tenements in Victoria at 30 September 2014

Nature of Title	Area	Name	Status
EL 5291	**298 sq km**	**Nhill**	**Granted 5/8/2010 for five years**

Directors' Report

The directors of Austpac Resources N.L., ('the company') A.C.N. 002 264 057, present their report together with the financial report of the company and of the consolidated entity, being the company and its controlled entities, for the financial year ended 30 June 2014 and the auditors' report thereon.

Directors

The directors of the company at any time during or since the end of the financial year are:

TERRY CUTHBERTSON *ACA* Chairman

Age 64

Mr Cuthbertson is currently Chairman of Montec International Limited, S2 Net Limited, MyNetFone Ltd, South American Iron & Steel Ltd, and Malachite Resources Ltd, and Non-Executive Director of Mint Wireless Ltd and OMI Ltd. He was previously Group Finance Director for Tech Pacific Holdings Pty Ltd which generated over $2 billion in revenues from operations throughout the Asia-Pacific Region. From 1986 to 1995 he was a Senior Partner of KPMG, specialising in strategic and corporate advice to major corporations. Mr Cuthbertson brings extensive international corporate experience to Austpac including a practical operating knowledge of business practices and structures in India, China and Southeast Asia.

Mr Cuthbertson was appointed a Director of Austpac Resources N.L. on 27 March 2001 and Chairman of Austpac Resources N.L. on 31 May 2004.

MICHAEL J. TURBOTT *BSc (Hons), FAusIMM, MAIG* Managing Director

Age 70

Mr Turbott was formerly a Director and Vice President of Kennecott Explorations (Australia) Ltd, and was in charge of the exploration programs that led to the discovery of the Lihir gold deposit in Papua New Guinea and to the acquisition and initial development of the Gordonstone (Kestrel) coal mine in the Bowen Basin, Queensland. His 46 years' experience in the mining industry has encompassed a wide variety of exploration and development projects in Australia, New Zealand, Papua New Guinea, Indonesia, Philippines, Canada and the USA.

Mr Turbott has been the Managing Director of Austpac Resources N.L. since its formation as an epithermal gold explorer in 1985. In 1988 Austpac became involved in the Westport ilmenite sand deposits in New Zealand. This led to the development of Austpac's proprietary ERMS roasting process to separate refractory ilmenite and, subsequently, to the patented EARS acid regeneration process. Under Mr Turbott's direction, since the mid 1990s Austpac has focused on its mineral sand technologies and has developed the ERMS SR process to produce very high grade synthetic rutile and a valuable iron co-product from ilmenite, a process to recover iron and hydrochloric acid from iron oxides and spent pickle liquor which are wastes produced by steel mills, a continuous leaching process, specialist know-how in low temperature roasting and in the treatment of iron minerals.

ROBERT J. HARRISON *FAICD* Non-Executive Director

Age 75

Mr Harrison has over 26 years' experience in the marketing of ilmenite, rutile and zircon. He was Managing Director of Consolidated Rutile Limited's marketing subsidiary Minerals Pty Limited for a number of years before forming the mineral sands marketing consultancy Mineralex Agencies Pty Limited, of which he is Managing Director. Since 1986 Mr Harrison has provided marketing support, market surveys, statistical analyses and product reviews for titanium dioxide feedstocks, titanium dioxide pigments and zircon to a range of significant producers and consumers of those products in Australia, India, Africa, Europe and the North America.

Mr Harrison was appointed a Director of Austpac Resources N.L. on 1 September 2004.

Company Secretary

Mr Gaston is a Chartered Secretary with 41 years listed public company experience including Lend Lease Corporation, Peko Wallsend Limited and American Metals Climax (AMAX).

Officers who were previously partners of the audit firm

Officers who were previously partners of the current audit firm KPMG, at the time when KPMG undertook an audit of the company – T. Cuthbertson who retired from KPMG in 1995.

Directors' Interests and Benefits

The relevant interest of each director in the share capital of the company at the date of this report and as notified by the directors to the Australian Stock Exchange in accordance with Section 205G(1) of the *Corporations Act 2001* was:

	Ordinary Shares	
	Direct	*Indirect*
Terry Cuthbertson	–	7,766,667
Michael J. Turbott	18,867,785	3,283,333
Robert J. Harrison	6,500,000	–

Directors' Meetings

The number of meetings held and attended by each of the directors of the company during the financial year are:

	Board Meetings *attended*	Board Meetings *held during the time the director held office*	Audit Committee *Meetings attended*	Audit Committee *Meetings held*	Remuneration Committee *Meetings attended*	Remuneration Committee *Meetings held*
Terry Cuthbertson	13	13	2	2	1	1
Michael J. Turbott	13	13	2*	2	1*	1
Robert J. Harrison	13	13	2	2	1	1

** Attended by invitation*

Principal Activities

The principal activity of the consolidated entity is the development of mineral processing technology and exploration and development of mineral sands deposits and gold deposits.

Review and Results of Operations

Operating and Financial Review

This report should be read in conjunction with the Chairman's Review, the Directors Report on Operations Pictorial, and Exploration Report in the front section of the 2014 Annual Report.

Operations

NIRP

The Newcastle Iron Recovery Plant which is currently approaching the completion of construction and commencement of commissioning has been funded by licence fees, equity capital and the sale of EL 4521 for $7.5 million in December 2012.

Production is planned for 2015. At peak capacity the NIRP plant will produce 18,000 tpa of iron and 18,000 tpa of hydrochloric acid.

Technologies

The Austpac Resources N.L. suite of proprietary technologies has been developed over the last 20 years and embraces commercial value adding technology to beneficiate ilmenite to produce high grade synthetic rutile; and to recycle spent pickle liquor and mill scale steel industry waste to produce high grade hydrochloric acid and direct reduced iron.

The schedule and timetable of development of these technologies is to complete in 2014 construction and commissioning of the Newcastle Iron Recovery Plant which employs the EARS acid regeneration technology which produces acid and iron.

In 2014 negotiations continued with international groups for the development of the next technology for production of synthetic rutile employing the ERMS technology.

Future Potential of Technologies to be further developed

Synthetic rutile technology which has been developed by Austpac since the 1980s has application potential for the titanium pigment industry and the titanium sponge industry. Discussions continue with major overseas companies for these applications.

Following the completion of construction and commissioning of the Newcastle Iron Recovery Plant, Austpac will progress with technology licenses to the steel and related industries for use of the technologies utilized at the Newcastle plant.

Bulk trials leading to technology licences are planned for 2014/2015.

Exploration Division

Austpac maintains a low cost diversified activity which includes mineral sand technology, steel industry technology, acid regeneration and iron products, gold and base metals exploration.

The exploration division has generated profit and cash flow to enable funding the construction of the Newcastle Iron Recovery Plant. This low cost division has contributed to the longevity of the company through risk diversification.

Financial Position – Financial Performance

Austpac Resources N.L. reported a loss for the year ending 30 June 2014 of $3,286,662 (2013: $3,724,532 profit).

The consolidated balance sheet at 30 June 2014 includes $35 million of capitalised technology expenditure which includes the Newcastle Iron Recovery Plant.

An independent valuation in 2013 values the suite of technologies in commercial settings at between $131.8 million and $161.2 million.

Financial Forecast

Austpac Resources N.L. carries no structured or secured debt and all technology assets are unsecured.

Austpac Resources N.L. will look to fund future operations through debt or equity, the successful commercialisation of mineral technologies or the joint venturing or sale of interests held in mineral projects.

Risk Profile

Austpac Resources N.L. is a high risk emerging mineral and steel technology company.

Key business risks applicable to Austpac Resources N.L. include risks associated with access to continual funding, the commercialisation of Austpac's technology and Austpac's ability to achieve this commercialisation in line with financial forecasts.

Dividends

No dividends were paid or declared by the company during the year. The directors do not recommend the payment of a dividend.

State of Affairs

In the opinion of the directors there were no significant changes in the state of affairs of the consolidated entity that occurred during the financial year which are not disclosed in the Annual Report.

Subsequent Events

Since the end of the financial year ending 30 June 2014, there have been no material events other than the completion of a placement of 11 million fully paid ordinary shares at 2.2 cents each to professional investors to raise $242,000 in July 2014, and a placement of 13,750,000 fully paid ordinary shares at 2.2 cents each to professional investors to raise $302,500 in September 2014.

Likely Developments

Except as described elsewhere in this Annual Report, further information about likely developments in the operations of the Group and the expected results of those operations in future financial years has not been included in this report because disclosure of the information would be likely to result in unreasonable prejudice to the Group.

Environmental Regulation

The consolidated entity's operations are subject to significant environmental regulations under both Commonwealth and State legislation in relation to its technology development.

The directors are not aware of any breach during the period covered by this report.

Options

During or since the end of the financial year no options have been granted by the company and there are no outstanding options on issue at the date of this report.

Indemnification and Insurance of officers and auditors

The company does not have a Directors' and Officers' insurance against liability which may arise from holding the position of Director or Officer.

The company has not, during or since the end of the financial year, in respect of any person who is or has been an officer or auditor of the company or related body corporate, indemnified or made any relevant agreement for indemnifying against a liability incurred as an officer, including costs and expenses in successfully defending legal proceedings.

Non-audit services

During the year KPMG, the company's auditor, has performed taxation services totaling $37,500 (2013: $37,500) in addition to their statutory duties.

The Board has considered the non-audit services provided during the year by the auditor and in accordance with written advice provided by resolution of the audit committee, is satisfied that the provision of those non-audit services during the year by the auditor is compatible with, and did not compromise, the auditor independence requirements of the *Corporations Act 2001* for the following reasons:

- All non-audit services were subject to the corporate governance procedures adopted by the company and have been reviewed by the audit committee to ensure they do not impact the integrity and objectivity of the auditor; and
- The non-audit services provided do not undermine the general principles relating to auditor independence as set out in Professional Statement F1 *Professional Independence*, as they did not involve reviewing or auditing the auditor's own work, acting in a management or decision making capacity for the company, acting as an advocate for the company or jointly sharing risks and rewards.

A copy of the Lead auditors' independence declaration as required under Section 307C of the Corporations Act, is provided on page 18, is included in the Directors' Report.

Remuneration Report (audited)

DIRECTORS' AND SENIOR EXECUTIVES' EMOLUMENTS

The Board remuneration policy is to ensure the remuneration package properly reflects the duties and responsibilities of the director. The Remuneration Committee ascertains non-executive Director remuneration and also staff remuneration which are separate and distinct. Remuneration is set by the Board of Directors. The company has a remuneration policy aimed at retention of key technical staff to ensure the progression and commercialisation of the company's technologies.

The company is managed by the Managing Director, supported by the Board of Directors. The company does not have senior executive staff. The company has no employees that are specified executives.

Executive Directors are solely remunerated by fixed remuneration packages, including base remuneration (which is calculated on a total cost basis and includes any FBT charges related to employee benefits including motor vehicles) as well as employer contributions to super funds.

Non-executive director remuneration

The Board seeks to set aggregate remuneration at a level which provides the company with the ability to attract and retain directors, whilst incurring a cost which is acceptable to shareholders.

Structure

The Constitution and the ASX Listing Rules specify that the aggregate remuneration of non-executive directors shall be determined from time to time by a general meeting. An amount not exceeding the amount determined is then divided between the directors as agreed. The latest determination was at the Annual General Meeting held on 22 November 2007 when shareholders approved an aggregate remuneration of $150,000 per year.

The amount of aggregate remuneration sought to be approved by shareholders and the manner in which it is apportioned amongst directors is reviewed annually.

Each non-executive director either receives a fee for being a director of the company and, if other services are provided, under a consultancy agreement. An additional fee may be payable for each board committee on which a director sits. The payment of additional fees for serving on a committee recognises the additional time commitment required by directors who serve on one or more sub committees.

Non-executive directors have long been encouraged by the Board to hold shares in the company (purchased by the director on market or issued in lieu of fees at a market price). It is considered good governance for directors to have a stake in the company. The non-executive directors of the company can participate in the Employee Share Purchase Plan.

Consequences of performance on shareholder wealth:

	2014	2013	2012	2011	2010
Profit (loss) attributable to owners of the Company	(3,286,662)	3,724,532	2,843,549	(2,909,149)	(2,638,301)
Share price	0.02	0.01	0.03	0.04	0.03

The overall level of compensation does not take into consideration the profit and/or share price. The overall level of compensation has remained at the same level since 2007 and Austpac Resources N.L. will re-evaluate the level of compensation when the mineral technologies have been commercialised.

Executive director remuneration

The company aims to reward executives with a level and mix of remuneration commensurate with their position and responsibilities within the company and so as to align the interests of executives with those of shareholders.

Remuneration consists of fixed remuneration only, and as such does not vary with the company's performance.

Fixed Remuneration

Objective

Remuneration is set by the Board of Directors and reflects a cost containment program implemented in January 2009.

Structure

Fixed remuneration consists of base remuneration (which is calculated on a total cost basis and includes any FBT charges related to employee benefits including motor vehicles) as well as employer contributions to super funds.

Variable Remuneration

There is no variable performance related remuneration.

Employment contracts

Currently no employee is employed under contract.

Details of the nature and amount of each major element of the emoluments of each director of the company for the year ending 30 June 2014 are:

2014	Short Term		Post Employment	
	Base	*Non Monetary Benefits*	*Consulting Fees*	*Super*	Total
	$	$	$	$	$
Mr M.J. Turbott	249,004	80,098	–	70,000	399,102
Mr T. Cuthbertson	70,000	–	35,000	–	105,000
Mr R. Harrison	50,000	–	35,000	–	85,000
	369,004	**80,098**	**70,000**	**70,000**	**589,102**

Details of the nature and amount of each major element of the emoluments of each director of the company for the year ending 30 June 2013 are:

2013	Short Term		Post Employment	
	Base	*Non Monetary Benefits*	*Consulting Fees*	*Super*	Total
	$	$	$	$	$
Mr M.J. Turbott	283,004	82,266	–	50,000	415,270
Mr T. Cuthbertson	70,000	–	35,000	–	105,000
Mr R. Harrison	50,000	–	35,000	–	85,000
	403,004	**82,266**	**70,000**	**50,000**	**605,270**

Non monetary benefits relate to motor vehicles during the financial year and insurance paid for the Managing Director and consultancy fees relate to additional services provided by Messrs Cuthbertson and Harrison for professional time in excess of normal Director duties.

Notsag Pty Limited, a company which provides corporate, financial, underwriting and guarantee services, employs Mr N. Gaston and provides his services as company secretary. Notsag Pty Limited received fees of $300,300 during the financial year ended 30 June 2014 ($291,200 – 2013).

Compensation levels for key management personnel are competitively set to attract and retain appropriately qualified and experienced personnel.

EMPLOYEE SHARE PLANS

Directors are entitled to participate in the Employee Share Purchase Plan when issues are proposed. All issues under the plan are approved in Annual General Meeting before being allocated. No shares were issued under the plan during the financial year ended 30 June 2014.

OTHER BENEFITS

Key management personnel receive additional benefits as non-cash benefits, as part of the terms and conditions of their appointment. The key management personnel receive non-cash benefits related to motor vehicles leases, and the Company pays fringe benefits tax on these benefits.

Signed at Sydney this twenty fifth day of September 2014 in accordance with a resolution of the Board of Directors of Austpac Resources N.L.

T. Cuthbertson
Chairman

M.J. Turbott
Managing Director

Lead Auditor's Independence Declaration

Under Section 307C of the *Corporations Act 2001*

To: the directors of Austpac Resources N.L.

I declare that, to the best of my knowledge and belief, in relation to the audit for the financial year ended 30 June 2014 there have been:

(i) no contraventions of the auditor independence requirements as set out in the *Corporations Act 2001* in relation to the audit; and

(ii) no contraventions of any applicable code of professional conduct in relation to the audit.

Corporate Governance Statement

This Statement outlines the main corporate governance practices in place throughout the financial year, which comply with the ASX Corporate Governance Council recommendations unless otherwise stated.

Board of Directors

The Board is responsible for the overall Corporate Governance of the consolidated entity including formulating its strategic direction, establishing goals for management and monitoring the achievement of these goals. The Board has established a framework for the management of the consolidated entity including a system of internal control, a business risk management process and the establishment of appropriate ethical standards.

A description of the company's main corporate governance practices is set out below. All these practices were in place for the entire year.

Board Process

The Board usually holds 12 scheduled meetings every year plus any additional meetings as required. The agenda for Board meetings is prepared by the Company Secretary in conjunction with the Chairman and Managing Director. Standing agenda items include the Managing Directors report, financial report and project activity reports together with governance and compliance issues. Board papers are circulated in advance.

The monthly board papers include monthly and year to date financial reports for all projects and corporate expenditure. A monthly revised forecast for the financial year is presented at each Board Meeting and compared against approved budgets.

Twelve monthly budgets are submitted for the forthcoming financial year, three months in advance and reviewed three times for refinement and ultimate approval.

Three year and five year plans are maintained and revised in accordance with requirements and financial capability of the consolidated entity.

Composition of the Board

At the date of this report, the Board of Directors comprises a non-executive independent chairman, one independent Director and the Managing Director.

The members of the Board of Directors appear on page 12 of the Directors' Report with brief resumes and profiles. The Board elects Directors on the basis of Corporate requirements and project activity. High calibre independents with substantial experience at senior levels are sought when required. Directors are considered independent if they meet the following independent Directors standard:

- Is not a substantial shareholder of Austpac Resources N.L.;
- Has not within the last 3 years been employed in a senior capacity by Austpac Resources N.L. or been a director after ceasing to hold any such employment;
- Is not a principal or employee of a professional advisor to Austpac Resources N.L.;
- Is not a material supplier or customer of Austpac Resources N.L. or an officer of or directly or indirectly associated with a significant supplier or customer;
- Has no material contractual relationship with Austpac Resources N.L. or any of its associates other than as a director of Austpac Resources N.L.;
- Has no other interest or relationship that could interfere with the director's ability to act in the best interests of Austpac Resources N.L. and independently of management; and
- Has not served on the Board for a period which could, or could reasonably be perceived to, materially interfere with the director's ability to act in the best interests of Austpac Resources N.L.

In this context the Board considers material, any director-related business relationship that is or is likely in the future to be more than 10 per cent of the director-related business's revenue.

All directors are expected to act in the best interests of Austpac Resources N.L.

The members of each Board Committee are independent Directors. The Audit Committee and the Remuneration Committee are chaired by an independent Director and are composed of independent Directors.

Board Committees

Two permanent Board Committees have been established to assist in the execution of the Board's responsibilities as described below. These are:

- Audit Committee
- Remuneration Committee

These Committees have charters which are reviewed on a regular basis. All Board members are free to attend any meeting of any Board Committee. All Committees have access to professional advice from the employees within Austpac Resources N.L. and from appropriate external advisors. Committees may meet these external advisors without Management being present.

The Board does not have a Nomination Committee. The Board is of the opinion that due to the nature and size of the Company, the functions performed by a Nomination Committee can be adequately handled by the full board.

AUDIT COMMITTEE

The role of the Audit Committee is documented in a Charter which is approved by the Board of Directors. In accordance with this Charter, all members of the Committee must be non-executive directors with a majority being independent. The role of the Committee is to advise on the establishment and maintenance of a framework of internal control and appropriate ethical standards for the management of the consolidated entity.

The Committee also gives the Board of Directors additional assurance regarding the quality and reliability of financial information prepared for use by the Board in determining policies or for inclusion in the financial report.

The members of the Audit Committee during the year were:

- Mr T. Cuthbertson (Chairman)
- Mr R. Harrison

The profiles of these Directors are included on page 12 of the Directors' Report. The Directors of this Committee are independent Directors.

The external auditors, the Managing Director and Company Secretary, are invited to Audit Committee meetings. The Committee meets at least twice a year.

The responsibilities of the Audit Committee include:

- reviewing the financial report and other financial information distributed externally;
- monitoring corporate risk assessment processes;
- reviewing any new accounting policies to ensure compliance with Australian Accounting Standards and generally accepted accounting principles;
- reviewing external audit reports to ensure that where major deficiencies or breakdowns in controls or procedures have been identified, appropriate and prompt remedial action is taken by management;
- reviewing the nomination and performance of the auditor. The external auditors were appointed in 1985. The lead external audit engagement partner was last rotated in 2013;
- liaising with the external auditors and ensuring that annual and half-year statutory audits are conducted in an effective manner;
- monitoring the establishment of an appropriate internal control framework and considering enhancements;
- monitoring the establishment of appropriate ethical standards;
- monitoring the procedures in place to ensure compliance with the *Corporations Act 2001* and Stock Exchange Listing Rules and all other regulatory requirements;
- addressing any matters outstanding with auditors, Australian Taxation Office, Australian Securities and Investments Commission, Australian Stock Exchange and financial institutions;
- reviewing reports on any major defalcations, frauds and thefts from the company and ensuring that the company's Internal Control Plan is adhered to;
- improving the quality of the accounting function.

The Audit Committee reviews the performance of the external auditors on an annual basis and normally meets with them during the year as follows:

Audit Planning

- To discuss the external audit plan;
- To discuss any significant issues that may be foreseen;
- To discuss the impact of any proposed changes in accounting policies on the financial statements;
- To review the nature and impact of any changes in accounting policies adopted by the consolidated entity during the year;
- To review the fees proposed for the audit work to be performed.

Prior to announcement of results

- To review the half-yearly and annual report prior to lodgment of those documents with the ASX, and any significant adjustments required as a result of the audit;
- To make the necessary recommendation to the Board for the approval of these documents.

Half-yearly and annual reporting

- To review the results and findings of the auditor, the adequacy of accounting and financial controls, and to monitor the implementation of any recommendations made;
- To review the draft financial report and the audit report and to make the necessary recommendation to the Board for the approval of the financial report.

The Managing Director and Company Secretary/Chief Financial Officer have declared in writing to the Board that Austpac Resources N.L. Financial Report for the year ended 30 June 2014 presents fairly, in all material respects, Austpac Resources N.L. financial condition and operational results and is in accordance with applicable Accounting Standards. The Committee has the power to conduct or authorise investigations into, or consult independent experts on, any matters within the Committee's scope of responsibility. The Committee has a documented charter which incorporates the ASX Best Practice Guidelines.

The Committee assists the Board to fulfill its corporate governance and disclosure responsibilities in relation to financial reporting, internal control structure, risk management systems and external audit. This includes:

- exercising oversight of the accuracy and completeness of the financial statements and their adequacy for security holders, compliance with the *Corporations Act 2001*, ASX Listing Rules and other regulatory requirements;
- making informed decisions regarding accounting policies, practices and disclosures;
- reviewing the scope and results of operational risk reviews and external audits;
- assessing the performance and adequacy of Austpac Resources N.L.'s internal control framework including accounting, compliance and operational risk management controls;
- annual review of the external auditor's performance taking into account the duration of the appointments, date of partner rotation, fees paid and considering matters requiring discussion in the absence of Management; and
- other related matters including monitoring insurance coverage, related party transactions and monitoring litigation other than in the normal course of business.

The Audit Committee also has responsibility for the oversight and monitoring of risk management. It is also responsible for the nomination and removal of external auditors. The following principles and practices are adopted:

- The external auditor must remain independent of Austpac Resources N.L. at all times;
- The external auditor is to be appointed to all controlled entities in the Group;
- The external auditor must not undertake staff recruitment or provide internal audit, management, or IT consulting services to Austpac Resources N.L.;
- The external auditor is not to provide non-audit services under which the auditor assumes the role of management, becomes an advocate for Austpac Resources N.L. or audits its own professional expertise;
- The external audit engagement partner and review partner will be rotated every five years.

The external auditor provides an annual declaration of independence as required by the *Corporations Act 2001*,which is consistent with Professional Statement F.1 of the Code of Professional Conduct as recognised by Australia's professional accounting bodies.

Risk Management

Oversight of the risk management system

The Board oversees the establishment, implementation and annual review of Austpac Resources N.L. risk management system with assistance from the Audit Committee. Management has established and implemented a risk management system for assessing, monitoring and managing operational financial reporting and compliance risk for Austpac Resources N.L.

Functional systems of risk management and reporting between project level, senior management and the Board of Directors have been established.

The Managing Director and the Company Secretary/Chief Financial Officer have declared, in writing to the Board, that Austpac Resources N.L.'s financial reporting, risk management and associated compliance and controls have been assessed and are operating efficiently and effectively.

During each Audit Committee meeting the Audit Committee reports to the Board on the status of risks through integrated risk management programmes aimed at ensuring all risks are identified, assessed and appropriately managed.

Risk Profile

In order to identify the material risks facing Austpac Resources N.L. and prioritise the actions necessary to mitigate these risks, an annual risk review is undertaken to identify, assess, monitor and manage the financial, operational and strategic risks.

Risk management and compliance and control

A robust risk management framework coupled with thorough internal reporting processes and highly qualified, competent and reliable staff provides Austpac Resources N.L. with a solid platform from which Austpac Resources N.L. manages the main areas of risk impacting the business.

Assessment of effectiveness

The effectiveness of risk management practices is assessed and reported to both Executive Management and the Audit Committee.

Commitment to shareholders and an informed market

The Board believes that security holders and the investment market generally, should be informed of all major business events that influence Austpac Resources N.L. in a timely and widely available manner. The full board of directors ensures that Austpac Resources N.L. meets its disclosure obligations under ASX Listing Rule 3.1.

Austpac Resources N.L. produces two sets of financial information annually; the half-yearly Financial Report for the six months to 31 December and the Annual Report and Financial Report for the year to 30 June. This is in addition to the Australian Stock Exchange quarterly working capital reports in July, October, January and April.

Shareholders have the right to attend the Annual General Meeting of Shareholders, usually held towards the end of November each year. Shareholders are provided with an explanatory memorandum on the resolutions proposed in the Notice of Meeting.

A copy of the Notice of Meeting is mailed to shareholders who are encouraged to vote on all resolutions. Unless specifically stated in the Notice of Meeting, all holders of securities are eligible to vote on all resolutions. In the event that shareholders cannot attend the Annual General Meeting of Shareholders they are able to lodge a proxy in accordance with the *Corporations Act 2001*. Proxy forms may be lodged by facsimile. Austpac Resources N.L.'s external auditor also attends the AGM and is available to answer any questions about the conduct of the audit and the audit report from security holders.

Staff and director trading in Austpac Resources N.L.'s securities

Austpac Resources N.L. Board members may only trade in Austpac Resources N.L.'s securities during a nominated trading window which is within three weeks after any announcement to the Australian Stock Exchange. At other times, they may trade with the concurrence of two Non-Executive Directors, one of which must be the Chairman. Trading in securities by Directors and senior staff at any time requires the consent of two Non-Executive Directors, one of which must be the Chairman. All other employees require the prior consent of the Managing Director to trade in securities.

Share trading policy

Austpac Resources N.L. approved a share trading policy on 10 January 2012. This policy was lodged with the Australian Securities Exchange on 10 January 2012.

REMUNERATION COMMITTEE

The Remuneration Committee meets in January each year or more frequently if Cost Containment programs are to be implemented. The members of the Remuneration Committee are:

- Mr T. Cuthbertson (Chairman)
- Mr R. Harrison

The profiles of these Directors are included on page 12 of the Directors' Report. The Directors of this Committee are independent Directors.

The Remuneration Committee assists the Board in ensuring that Austpac Resources N.L.'s remuneration levels are appropriate in the markets in which it operates and are applied fairly to attract and retain appropriately qualified and experienced directors and senior staff. The Committee obtains independent advice on the appropriateness of remuneration packages, given trends in comparative companies.

The Committee also has the responsibility to review and approve, on behalf of the Board, recommendations for annual staff remuneration made by Management and review and recommend to the Board:

- proposals for changes to remuneration policies and human resources issues which are referred to the Board by the Managing Director;
- remuneration recommendations relating to the Chairman, Non-Executive Directors, the Managing Director and senior Management, including incentive policies for the Managing Director and the senior Management team;
- Austpac Resources N.L. recruitment, retention and termination policies and procedures for senior Management;
- incentive schemes;
- superannuation arrangements;
- creation or amendment of any employee or executive share schemes; and
- the remuneration framework for Non-Executive Directors including the amount of directors' fees, any increase in the overall amount of directors' fees and any increase requiring security holder approval.

Code of conduct

The Group has advised each director, manager and employee to comply with the Group's Ethical Standards, covering:

- aligning the behaviour of the board and management with the code of conduct by maintaining appropriate core Group values and objectives
- fulfilling responsibilities to shareholders by delivering shareholder value
- usefulness of financial information by maintaining appropriate accounting policies, practices and disclosure
- fulfilling responsibilities to clients, customers and consumers by maintaining high standards of product quality, service standards, commitments to fair value, and safety of goods produced
- employment practices such as occupational health and safety, employment opportunity, training and education support, community activities, sponsorships and donations
- responsibilities to the individual, such as privacy, use of privileged or confidential information, and conflict resolution
- compliance with legislation including policies on legal compliance in countries where the legal systems and protocols are significantly lower than Australia's
- managing actual or potential conflicts of interest
- corporate opportunities such as preventing directors and key executives from taking improper advantage of property, information or position for personal gain
- reporting of unlawful or unethical behaviour including protection of those who report violations in good faith
- the processes for monitoring and ensuring the compliance with the code of conduct.

Diversity

The board is committed to having an appropriate blend of diversity on the board and in the Group's senior executive positions. The board has established a policy regarding gender, age, ethnic and cultural diversity.

The key elements of the diversity policy are as follows:

- increased gender diversity on the board and senior executive positions and throughout the Group;
- annual assessment of board gender diversity objectives and performance against objectives by the board and nomination committee.

The Statements of Cash Flows are to be read in conjunction with the Notes to the Financial Statements set out on pages 28 to 42.

Notes to the Financial Statements

For the year ended 30 June 2014

Note 1: Significant Accounting Policies

(A) SIGNIFICANT ACCOUNTING POLICIES

Austpac Resources N.L. (the 'company') is a company domiciled in Australia. The consolidated financial report of the company for the year ended 30 June 2014 comprises the company and its subsidiaries (the 'consolidated entity'). The consolidated entity is a for profit entity, and is primarily involved in the development of mineral processing technology and exploration of mineral sand deposits and gold deposits.

Austpac Resources N.L. principal registered office is Level 3, 62 Pitt Street, Sydney NSW 2000.

The financial report was authorised for issue by the directors on 25 September 2014.

Statement of Compliance

The consolidated financial report is a general purpose financial report which has been prepared in accordance with Australian Accounting Standards (AASBs) adopted by the Australian Accounting Standards Board ('AASB') and the *Corporations Act 2001*. The company and the consolidated entity's financial report also complies with the International Financial Reporting Standards (IFRSs) adopted by the International Accounting Standards Board.

(B) BASIS OF PREPARATION

The financial report is presented in Australian dollars, which is the company's functional currency.

The financial report is prepared on the historical cost basis.

The preparation of a financial report in conformity with Australian Accounting Standards requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

The accounting policies set out below have been applied consistently to all periods presented in the consolidated financial report.

(C) GOING CONCERN

The financial report has been prepared on the basis of a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities will occur in the normal course of business. The Directors believe that the company and the consolidated entity will be able to fund future operations through share issues, the successful commercialisation of mineral technologies or the joint venturing or sale of interests held in mineral projects.

Without the commercialisation of mineral technologies, equity raisings or joint venturing or sale of interests held in mineral tenements and projects, there is a material uncertainty whether the consolidated entity will be able to continue as a going concern.

If the consolidated entity is unable to continue as a going concern, it may be required to make adjustments relating to the recoverability and classification of recorded asset amounts and classification of liabilities in order to realise its assets and extinguish its liabilities other than in the normal course of business and at amounts different from those stated in the financial report.

(D) BASIS OF CONSOLIDATION

(i) Subsidiaries

Subsidiaries are entities controlled by the company. Control exists when the company has the power, directly or indirectly, to govern the financial and operating policies of an entity so as to obtain benefits from its activities. The financial statements of subsidiaries are included in the consolidated financial report from the date that control commences until the date that control ceases.

In the company's financial statements, investments in subsidiaries are carried at the lower of cost or recoverable amount.

(ii) Jointly controlled operations and assets

The interest of the consolidated entity in unincorporated joint ventures and jointly controlled assets are brought to account by recognising in its financial statements the assets it controls and the liabilities that it incurs, and the expenses it incurs and its share of income that it earns from the sale of goods or services by the joint venture.

(iii) Transactions eliminated on consolidation

All intragroup balances and transactions, including any unrealised gains or losses are eliminated on consolidation.

(E) FOREIGN CURRENCY TRANSACTIONS

Transactions in foreign currencies are translated at the foreign exchange rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies at the balance date are translated to Australian dollars at the foreign exchange rate ruling at that date. Foreign exchange differences arising on translation are recognised in the statement of comprehensive income. Non-monetary assets and liabilities that are measured in terms of historical cost in a foreign currency are translated using the exchange rate at the date of the transaction. Non-monetary assets and liabilities denominated in foreign currencies that are stated at fair value are translated to Australian dollars at foreign exchange rates ruling at the dates the fair value was determined.

(F) PROPERTY, PLANT AND EQUIPMENT

Owned assets

Items of property, plant and equipment are stated at cost less accumulated depreciation (see below) and impairment losses (see accounting policy 1 (K)). The carrying amount of property, plant and equipment is reviewed annually by directors to ensure that it is not in excess of the recoverable amount from those assets. Where parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items of property, plant and equipment.

Any gains and losses on disposal of an item of property, plant and equipment (calculated as the difference between proceeds from disposal and the carrying amount of the item) is recognized in the Statement of Comprehensive Income.

Leased assets

Leases in terms of which the consolidated entity assumes substantially all of the risks and rewards of ownership are classified as finance leases. The property acquired by way of a finance lease is stated at an amount equal to the lower of its fair value and the present value of the minimum lease payments at inception of the lease, less accumulated depreciation and impairment losses.

Depreciation

Depreciation is charged to the statement of comprehensive income on a straight-line basis over the estimated useful lives of each part of an item of property, plant and equipment. The estimated useful lives in the current and comparative periods are as follows:

- fixtures and fitting, and property, plant and equipment 7 years
- leased plant and equipment and motor vehicles 10 years

The residual value and actual lives are assessed at each reporting date.

(G) INTANGIBLE ASSETS – MINERAL TECHNOLOGY DEVELOPMENT

Expenditure on research activities, undertaken with the prospect of gaining new scientific or technical knowledge and understanding, is recognised in the statements of comprehensive income as an expense as incurred.

Expenditure on development activities, whereby research findings are applied to a plan or design for the production of new or substantially improved products and processes, is capitalised if the product or process is technically and commercially feasible. The expenditure capitalised includes the cost of materials, direct labour and an appropriate proportion of overheads. Other development expenditure is recognised in the statement of comprehensive income as an expense as incurred. Capitalised development expenditure is stated at cost less accumulated amortisation (see below) and impairment losses (see accounting policy 1(K)).

Amortisation

Mineral technology development assets are not currently being amortised as the policy applied by the consolidated entity is to amortise these assets on a systematic basis over projected revenue streams once commercial licence agreements have been agreed.

(H) INTANGIBLE ASSETS – EXPLORATION AND EVALUATION ASSETS

Exploration and evaluation costs, including the costs of acquiring licences, are capitalised as exploration and evaluation assets on an area of interest basis. Costs incurred before the consolidated entity has obtained the legal rights to explore an area are recognised in the statement of comprehensive income.

Exploration and evaluation assets are only recognised if the rights of the area of interest are current and either:

(i) the expenditures are expected to be recouped through successful development and exploitation of the area of interest; or

(ii) activities in the area of interest have not at the reporting date, reached a stage which permits a reasonable assessment of the existence or other wise of economically recoverable reserves and active and significant operations, in, or in relation to, the area of interest are continuing.

Exploration and evaluation assets are assessed for impairment if (i) sufficient data exists to determine technical feasibility and commercial viability, and (ii) facts and circumstances suggest that the carrying amount exceeds the recoverable amount (see impairment, accounting policy 1(K)). For the purposes of impairment testing, exploration and evaluation assets are allocated to cash-generating units to which the exploration activity relates. The cash generating unit shall not be larger than the area of interest.

Once the technical feasibility and commercial viability of the extraction of mineral resources in an area of interest are demonstrable, exploration and evaluation assets attributable to that area of interest are first tested for impairment and then reclassified from intangible assets to mining property and development assets within property, plant and equipment.

(I) TRADE AND OTHER RECEIVABLES

Trade and other receivables are recognised initially at fair value plus any directly attributable transaction costs, subsequent to initial recognition, these assets are measured at amortised cost less impairment losses (see accounting policy 1 (K)).

(J) CASH AND CASH EQUIVALENTS

Cash and cash equivalents comprises cash balances and call deposits.

(K) IMPAIRMENT

The carrying amounts of the consolidated entity's assets are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, the asset's recoverable amount is estimated (see below).

Recoverable amounts are estimated annually for intangible assets not yet available for use. An impairment loss is recognised where the carrying amount of an asset exceeds its recoverable amount. Impairment losses are recognised in the statement of comprehensive income unless the asset has previously been revalued, in which case the impairment loss is recognised as a reversal to the extent of that previous revaluation with any excess recognised through the statement of comprehensive income.

The recoverable amount of assets is the greater of their fair value less costs to sell and value in use.

Reversals of impairment

An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

(L) EMPLOYEE BENEFITS

Liabilities for employee entitlements for wages, salaries and annual and long service leave represent present obligations resulting from employees' services up to reporting date, based on current wage and salary rates, including related on-costs. Obligations for contributions to defined contribution superannuation plans are recognised as an employee benefit expense in the statement of comprehensive income in the periods during which services are rendered by employees. Obligations for employee benefits that are due or are expected to be paid more than 12 months after the end of the period in which the employees render the service are inflated for future expected salaries and discounted to their present value using an appropriate risk free rate.

(M) PROVISIONS

Provisions are recognised in the statement of financial position when the consolidated entity has a present legal or constructive obligation and it is probable that an outflow of economic benefits will be required to settle the obligation. If the effect is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and, when appropriate, the risks specific to the liability.

(N) TRADE AND OTHER PAYABLES

Trade and other payables are recognised initially at fair value plus any directly attributable costs, subsequent to initial recognition, these liabilities are measured at amortised cost.

(O) REVENUE

Revenue from License Fees are recognised in the profit or loss initially in proportion to the stage of completion of the transaction at the reporting date, then once completed on a straight line basis over the life of the agreement. The stage of completion is assessed by reference to surveys of work performed, when the work performed cannot be estimated reliably, revenue is recognised only to the extent of contract costs incurred that are likely to be recoverable in accordance with the underlying agreement.

(P) EXPENSES

Operating lease payments

Payments made under operating leases are recognised in the statement of comprehensive income on a straight-line basis over the term of the lease.

Net financing costs

Interest income and expense is recognised in the statement of comprehensive income as it accrues, using the effective interest method.

(Q) INCOME TAX

Income tax on the profit/(loss) for the years presented comprises current and deferred tax. Income tax is recognised in the statement of comprehensive income except to the extent that it relates to items recognised directly in equity, in which case it is recognised in equity.

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantially enacted at balance date and any adjustment to tax payable in respect of previous years. Deferred assets and liabilities are recognised for temporary differences between the tax values of assets and their carrying amounts in the financial statements.

A deferred tax asset is recognised only to the extent that it is probable that future taxable profits will be available against which the asset can be utilised. Deferred assets are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

(R) DERIVATIVES

The consolidated entity is exposed to changes in interest rates and commodity prices from its activities. The consolidated entity does not hedge these risks.

(S) SEGMENT REPORTING

The consolidated entity operates in one segment only, being Mineral Sands and Mineral Sands Technology Development in Australia.

(T) ACCOUNTING ESTIMATES AND JUDGEMENTS

The estimates and judgements that have a significant risk of causing a material adjustment to the carrying amounts of assets within the next financial year are discussed below.

Recoverability of intangible assets

The carrying amount of intangible assets relating to mineral technology development and exploration and development total $34,562,713 ($32,346,679 – 2013). The consolidated entity assesses intangibles which are not being amortised annually in accordance with the accounting policy in note 1(K). The ultimate recoupment of cost carried forward are dependent upon the successful development and commercial exploitation or sale of the respective areas and technology.

(U) GOODS AND SERVICES TAX

Revenue, expenses and assets are recognised net of the amount of goods and services tax (GST), except where the amount of GST incurred is not recoverable from the taxation authority. In these circumstances, the GST is recognised as part of the cost of acquisition of the asset or as part of the expense.

Receivables and payables are stated with the amount of GST included. The net amount of GST recoverable from, or payable to, the ATO is included as a current asset or liability in the statement of financial position.

Cash flows are included in the statement of cash flows on a gross basis. The GST components of cash flows arising from investing and financial activities which are recoverable from, or payable to, the ATO are classified as operating cash flows.

(V) NEW STANDARDS/INTERPRETATIONS NOT YET ADOPTED

New Accounting Standards

New accounting standards adopted for the first time in these financial statements include AASB 10 *Consolidated Financial Statements*, AASB 11 *Joint Arrangements*, AASB 12 *Disclosure of Interest in Other Entities*, AASB 13 *Fair Value Measurement* and AASB 119 *Employee Benefits* (2011).

There were no significant impacts arising from accounting standards or interpretations adopted for the first time in these Financial Statements.

New Accounting Standards and Interpretations that are not yet mandatory

Certain new accounting standards and interpretations have been published that are not mandatory for 30 June 2014 reporting periods. The Consolidated Entity and the Company's assessment of the impact of these new standards and interpretations is set out below. The Consolidated Entity and the Company does not plan to adopt these standards early.

AASB 9 *Financial Instruments* (2013) AASB 9 *Financial Instruments* (2010), AASB 9 *Financial Instruments* (2009)

AASB 9 (2009) introduces new requirements for the classification and measurement of financial assets. Under AASB 9 (2009), financial assets are classified and measured based on the business model in which they are held and the characteristics of their contractual cash flows. AASB 9 (2010) introduces additional changes relating to financial liabilities. AASB 9 (2013) introduces new requirements for hedge accounting.

The AASB has yet to approve the latest version of IFRS 9 which was issued by the IASB in July 2014. This version includes limited amendments to the classification and measurement requirements and the new requirements for impairment of financial assets.

AASB 9 is effective for annual periods beginning on or after 1 January 2018. Early adoption is permitted. The adoption of these standards is expected to have no impact on the Consolidated Entity or the Company's financial assets and financial liabilities. As the Group does not have hedging arrangements, this will also not have an impact to the Consolidated Entity or the Company or their results.

Balance at 30 June 2014	34,562,713	–	34,562,713	34,562,713	–	34,562,713

Austpac Resources N.L. mineral technology development relates to the Newcastle Iron Recovery Plant which employs the EARS acid regeneration technology, as well as ERMS mineral technology development. The mineral technology development was valued by Halligans Associates, an independent valuer, at 30 June 2013 between $131.8 million to $161.2 million. The ultimate recoupment of costs carried forward are dependent upon the successful development and commercial exploitation of the technology.

Exploration and evaluation expenditure relates to EL 4521 in the prior year. Refer to Note 21 for further details.

Terms and Conditions

Ordinary Shares

Holders of fully paid ordinary shares are entitled to receive dividends if declared and are entitled to one vote per share at shareholders meetings.

Partly Paid Shares

Holders of Austpac Resources N.L. Employee Share Purchase plan shares are entitled to the same rights as ordinary shareholders, including entitlements to dividends if declared, once the shares are paid in full. The amount of unpaid capital is $7,472,623 (2013: $7,537,623). In the event of winding up, ordinary shareholders rank after creditors.

Dividends

No dividends were declared or paid during the financial year ended 30 June 2014.

Note 17: Commitments

Exploration and evaluation expenditure commitments
In order to maintain current rights of tenure to exploration tenements, the company and consolidated entity are required to perform minimum exploration work to meet the minimum expenditure requirements specified by various State governments. These obligations are subject to renegotiation when application for a mining lease is made and at other times. These obligations are not provided for in the financial report and are payable:

	CONSOLIDATED		THE COMPANY

	116,559	321,312	**116,559**	321,312

Note 18: Lease Liabilities

Lease (Capital – Finance)
Lease commitments in respect of capitalised finance leases are payable as follows:

Less than one year	**132,239**	71,520	**132,239**	71,520
Between one and five years	**205,698**	292,941	**205,698**	292,941
	337,937	364,461	**337,937**	364,461

The consolidated entity leases equipment under finance leases expiring from one to four years. At the end of the lease term the consolidated entity has the option to purchase the equipment at 40% of cost.

Operating Leases
Leases as lessee
Non-cancelable operating lease rentals are payable as follows:

Less than one year	**271,690**	267,594	**271,690**	267,594
Between one and five years	**363,446**	766,530	**363,446**	766,530
	635,136	1,034,124	**635,136**	1,034,124

The consolidated entity leases property at Kooragang Island and office property in Sydney.

During the year ended 30 June 2014, $267,613 was recognised as an expense in the statement of comprehensive income in respect of operating leases (2013: $257,844).

Note 19: Key Management Personnel Disclosures

The following were key management personnel of the consolidated entity at any time during the reporting period and unless otherwise indicated were key management personnel for the entire period:

Non-executive directors: Mr T. Cuthbertson (Chairman)
Mr R. Harrison

Executive directors: Mr M. Turbott

Details of the nature and amount of each major element of the emoluments of each director of the company for the year ending 30 June 2014 are:

2014	Short Term		Post Employment		
	Base	*Non Monetary Benefits*	*Consulting Fees*	*Super*	2014 Total
	$	$	$	$	$
Mr M.J. Turbott	249,004	80,098	-	70,000	399,102
Mr T. Cuthbertson	70,000	–	35,000	–	105,000
Mr R. Harrison	50,000	–	35,000	–	85,000
	369,004	80,098	70,000	70,000	589,102

Details of the nature and amount of each major element of the emoluments of each director of the company for the year ending 30 June 2013 are:

2013	Short Term		Post Employment		
	Base	*Non Monetary Benefits*	*Consulting Fees*	*Super*	2013 Total
	$	$	$	$	$
Mr M.J. Turbott	283,004	82,266	–	50,000	415,270
Mr T. Cuthbertson	70,000	–	35,000	–	105,000

	403,004	82,266	70,000	50,000	605,270

Non monetary benefits relate to motor vehicles during the financial year and insurance paid for the Managing Director. Consultancy fees relate to additional services provided by Messrs Cuthbertson and Harrison for professional time in excess of normal Director duties.

Notsag Pty Limited, a company which provides corporate, financial, underwriting and guarantee services, employs Mr N. Gaston and provides his services as company secretary. Notsag Pty Limited received fees of $300,300 during the financial year ended 30 June 2014 ($291,200 – 2013).

Austpac Resources N.L. engaged Mr T. Cuthbertson and Mr R. Harrison for the provision of consultancy services. The terms and conditions of the services are no more favourable than those available, or which might reasonable be expected to be available, on similar transactions to unrelated entities on an arm's length basis.

The details of the transactions are as follows:

			2014	2013
		Transaction	$	$
Specified Directors	Mr T. Cuthbertson	Consultancy Fees	**35,000**	35,000
	Mr R. Harrison	Consultancy Fees	**35,000**	35,000
K. Turbott (spouse of M. Turbott) provided secretarial services to the company. The details of the transactions with K. Turbott are as follows:				
Specified Directors	Mr M. Turbott	Secretarial Services	**75,996**	75,996

Note 19: Key Management Personnel Disclosures continued

Equity Instruments

Movement in shares

The movement during the reporting period in the number of ordinary shares of Austpac Resources N.L. held, directly, indirectly or beneficially, by each key management personnel, including their personally-related entities is as follows:

	2014			2013		
	Held at 1 July	Purchases	Held at 30 June	Held at 1 July	Purchases	Held at 30 June
Specified Directors						
Mr T. Cuthbertson						
– Fully Paid Ordinary Shares	**166,667**	**–**	**166,667**	166,667	–	166,667
– Partly Paid Ordinary Shares	**7,600,000**	**–**	**7,600,000**	7,600,000	–	7,600,000
Mr M. Turbott						
– Fully Paid Ordinary Shares	**6,800,000**	**1,000,000**	**7,800,000**	6,800,000	–	6,800,000
– Partly Paid Ordinary Shares	**15,351,118**	**(1,000,000)**	**14,351,118**	15,351,118	–	15,351,118
Mr R. Harrison						
– Fully Paid Ordinary Shares						
– Partly Paid Ordinary Shares	**6,500,000**	**–**	**6,500,000**	6,500,000	–	6,500,000

The above equity holdings include directors' entitlements arising under the consolidated entity Employee Share Purchase Plan. No shares were granted as compensation in 2014.

Options and rights over equity instruments

No options were granted since the beginning of the financial year.

Apart from the details disclosed in this note, no other Director has entered into a material contract with the company or the consolidated entity since the end of the previous financial year and there were no material contracts involving Directors' interests subsisting at year end.

Wholly owned group

Details of interests in wholly owned controlled entities are set out in Note 10.

Non Key management personnel disclosures

Identity of related parties

The company has a related party relationship with its subsidiaries (see note 10), and with its directors. A payable to Mr R. Harrison of $42,500, and Mr T. Cuthbertson of $52,500 was owed in respect of Director and Consultancy fees for services performed in the financial period to 30 June 2014 (2013: NIL).

Note 20: Events Subsequent to the end of the Financial Year

Since the end of the financial year ending 30 June 2014, there have been no material events other than the completion of a placement of 11 million fully paid ordinary shares at 2.2 cents each to professional investors to raise $242,000 in July 2014, and a placement of 13,750,000 fully paid ordinary shares at 2.2 cents each to professional investors to raise $302,500 in September 2014.

Note 23: Fair Value of Financial Assets and Liabilities

Fair values versus carrying amounts

The Consolidated Entity's accounting policies and disclosures may require the measurement of fair values for both financial and non-financial assets and liabilities. The Consolidated Entity has an established framework for fair value measurement. When measuring the fair value of an asset or a liability, the Consolidated Entity uses market observable data where available.

Fair values are categorised into different levels in a fair value hierarchy based on the following valuation techniques:

- Level 1: quoted prices (unadjusted) in active markets for identical assets and liabilities.
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

If the inputs used to measure the fair value of an asset or liability can be categorised in different levels of the fair value hierarchy, then the fair value measurement is categorised in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

The Consolidated Entity recognises transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

Financial assets and liabilities are stated at cost. The fair values together with the carrying amounts shown in the financial statement of financial position are as follows:

	Carrying amount 2014	Fair value 2014	Fair value hierarchy level	Carrying amount 2013	Fair value 2013	Fair value hierarchy level
	$	$		$	$	
Consolidated						
Trade and other receivables	**600,310**	**600,310**	**2**	1,440,477	1,440,477	2
Cash and cash equivalents	**89,098**	**89,098**	**1**	2,726,781	2,726,781	1
Finance lease liabilities	**337,937**	**374,663**	**2**	364,461	415,765	2
Trade and other payables	**811,982**	**811,982**	**2**	1,250,761	1,250,761	2
The Company

Cash and cash equivalents	**89,098**	**89,098**	**1**	2,726,781	2,726,781	1
Finance lease liabilities	**337,937**	**374,663**	**2**	364,461	415,765	2
Trade and other payables	**811,982**	**811,982**	**2**	1,250,761	1,250,761	2

Note 23: Fair Value of Financial Assets and Liabilities continued

Estimation of fair values

Due to the introduction of AASB 13 in 2013, the framework for measuring fair value has changed. The following summarises the major methods and assumptions used in estimating fair values of financial instruments:

(1) Receivables/payables

For receivables/payables with a remaining life of less than one year, the notional amount is deemed to reflect the fair value. All other receivables/payables are discounted to determine the fair value, if the effect of discounting is material.

(2) Finance lease liabilities

The fair value is estimated at the present value of future cash outflows. Future cash flows are discounted using appropriate market rates.

Note 24: Financial Risk Management

Overview

This note presents information about the company's and consolidated entity's exposure to credit, liquidity and market risks, their objectives, policies and processes for measuring and managing risk, and the management of capital.

The company and the consolidated entity do not use any form of derivatives as it is not at a level of exposure that requires the use of derivatives to hedge its exposure. Exposure limits are reviewed by management on a continuous basis. The consolidated entity does not enter into or trade financial instruments, including derivative financial instruments, for speculative purposes.

The Board of Directors has overall responsibility for the establishment and oversight of the risk management framework. Management monitors and manages the financial risks relating to the operations of the group through regular reviews of the risks.

Credit Risk

Credit risk is the risk of financial loss to the consolidated entity and to the company if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the consolidated entity's receivables from customers.

Presently, the consolidated entity undertakes technology development and exploration and evaluation activities exclusively in Australia. At the balance date there were no significant concentrations of credit risk.

Cash and cash equivalents

The consolidated entity's limits its exposure to credit risk by only investing in cash deposits with major banks.

Trade and other receivables

The consolidated entity and the company are exposed to credit risk in relation to receivables recorded on the statement of financial position.

The company and consolidated entity have established an allowance for impairment that represents their estimate of incurred losses in respect of other receivables and investments. The directors do not expect any counterparty to fail to meet its obligations.

Exposure to credit risk

The carrying amount of the consolidated entity's financial assets represents the maximum credit exposure. The consolidated entity's maximum exposure to credit risk at the reporting date was:

		CONSOLIDATED CARRYING AMOUNT	
		2014	2013
	Note	$	$
Receivables	9	**600,310**	1,400,477
Cash and cash equivalents	8	**89,098**	2,726,781

Guarantees

The consolidated entity's policy is not to provide financial guarantees.

Liquidity risk

Liquidity risk is the risk that the consolidated entity and the company will not be able to meet its financial obligations as they fall due. The consolidated entity's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the consolidated entity's reputation.

The consolidated entity and the company manages liquidity risk by maintaining adequate cash reserves from funds raised in the market and by continuously monitoring forecast and actual cash flows. The consolidated entity does not have any external borrowings.

The company anticipates a need to raise additional capital in the next 12 months to meet forecast operational, construction and exploration activities. The decision on how the company will raise future capital will depend on market conditions existing at that time.

Note 24: Financial Risk Management continued

The following are the contractual maturities of financial liabilities, including estimated interest payments and excluding the impact of netting agreements:

	Carrying amount	Contractual cash flows	6 months or less	6–12 months	1–2 years	2–5 years
	$	$	$	$	$	$
Consolidated 30 June 2014						
Finance lease liabilities	337,937	399,383	49,044	115,044	131,092	104,203
Trade and other payables	811,982	811,982	811,982	–	–	–
Consolidated 30 June 2013						
Finance lease liabilities	364,461	434,217	51,311	51,311	155,703	175,892
Trade and other payables	1,250,761	1,250,761	1,250,761	–	–	–

Market Risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates and equity prices will affect the consolidated entity's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimizing the return.

Currency Risk

The consolidated entity is not exposed to currency risk on purchases and borrowings that are denominated in a currency other than the respective functional currencies of consolidated entity entities, which is the Australian dollar (AUD).

The consolidated entity has not entered into any derivative financial instruments.

Exposure to currency risk

The consolidated entity and the company is not exposed to currency risk and at balance date the consolidated entity and the company holds no financial assets or liabilities which are exposed to foreign currency risk.

Interest rate risk

The consolidated entity is exposed to interest rate risk on cash investments, which is the risk that a financial instrument's value will fluctuate as a result of changes in the market interest rates on interest-bearing financial instruments. The consolidated entity does not use derivatives to mitigate these exposures.

The consolidated entity adopts a policy of ensuring that as far as possible it maintains excess cash and cash equivalents in short terms deposit bearing interest income at commercial rates.

Profile

At the reporting date the interest rate profile of the consolidated entity's and the company's interest-bearing financial instruments was:

	CONSOLIDATED CARRYING AMOUNT		COMPANY CARRYING AMOUNT	
	2014	2013	2014	2013
	$	$	$	$
Fixed rate instruments				
Financial assets (surplus cash invested)	**89,098**	2,726,781	**89,098**	2,726,781
Financial liabilities (plant and equipment leases)	**337,937**	364,461	**337,937**	364,461

Fair value sensitivity analysis for fixed rate instruments

The consolidated entity does not account for any fixed rate financial assets and liabilities at fair value through profit or loss. Therefore a change in interest rates at the reporting date would not affect profit or loss.

Commodity Price Risk

The consolidated entity operates primarily in mineral sands technology development and in exploration and evaluation and accordingly the consolidated entity's financial assets and liabilities are subject to minimal commodity price risk.

Capital Management

The consolidated entity's objectives when managing capital are to safeguard the consolidated entity's ability to continue as a going concern, in order to maintain a strong capital base sufficient to maintain future technology development and exploration of projects. In order to maintain or adjust the capital structure, the consolidated entity may issue new shares or sell assets to reduce debt. The consolidated entity's focus has been to raise sufficient funds through equity to fund technology development and exploration and evaluation activities. The consolidated entity monitors capital on the basis of the gearing ratio, however there are no external borrowings at 30 June 2014.

The consolidated entity provides employees with opportunities to participate in the Austpac Resources N.L. Staff Share Purchase Plan.

There were no changes in the consolidated entity's approach to capital management during the year. Risk management policies and procedures are established with regular monitoring and reporting.

Neither the company nor any of its subsidiaries are subject to externally imposed capital requirements.

Directors' Declaration

1. In the opinion of the Directors of Austpac Resources N.L:
   a) the financial statements and notes set out on pages 24 to 42 and the remuneration report in the Director's Report are in accordance with the *Corporations Act 2001*, including:
      i) giving a true and fair view of the financial position of the company and consolidated entity as at 30 June 2014 and of their performance for the year ended on that date; and
      ii) complying with Australia Accounting Standards and the Corporations Regulations 2001;
   b) the financial report also complies with International Financial Reporting Standards as disclosed in note 1(A); and
   c) there are reasonable grounds to believe that the company will be able to pay its debts as and when they become due and payable.
2. The directors have been given the declarations required by Section 295A of the *Corporations Act 2001* from the individuals acting in the role of chief executive officer and chief financial officer functions for the financial year ended 30 June 2014.

Signed in accordance with a resolution of the Directors.

T. Cuthbertson
Director

M.J. Turbott
Director

Sydney, 25th day of September 2014

Auditor's Report

Independent auditor's report to the members of Austpac Resources N.L.

Report on the financial report

We have audited the accompanying financial report of Austpac Resources N.L. (the Company), which comprises the statements of financial position as at 30 June 2014, and statements of comprehensive income, statements of changes in equity and statements of cash flows for the year ended on that date, notes 1 to 24 comprising a summary of significant accounting policies and other explanatory information and the directors' declaration of the company and the Group comprising the company and the entities it controlled at the year's end or from time to time during the financial year.

Directors' responsibility for the financial report

The directors of the company are responsible for the preparation of the financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001* and for such internal control as the directors determine is necessary to enable the preparation of the financial report that is free from material misstatement whether due to fraud or error. In note 1(a), the directors also state, in accordance with Australian Accounting Standard AASB 101 *Presentation of Financial Statements*, that the financial statements comply with International Financial Reporting Standards.

Auditor's responsibility

Our responsibility is to express an opinion on the financial report based on our audit. We conducted our audit in accordance with Australian Auditing Standards. These Auditing Standards require that we comply with relevant ethical requirements relating to audit engagements and plan and perform the audit to obtain reasonable assurance whether the financial report is free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial report. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial report, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation of the financial report that gives a true and fair view in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the financial report.

We performed the procedures to assess whether in all material respects the financial report presents fairly, in accordance with the *Corporations Act 2001* and Australian Accounting Standards, a true and fair view which is consistent with our understanding of the Company's and the Group's financial position and of their performance.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Independence

In conducting our audit, we have complied with the independence requirements of the *Corporations Act 2001*.

KPMG, an Australian partnership and a member firm of the KPMG network of independent member firms affiliated with KPMG International Cooperative ("KPMG International"), a Swiss entity.

Liability limited by a scheme approved under Professional Standards Legislation.

Auditor's opinion

In our opinion:

(a) the financial report of Austpac Resources N.L. is in accordance with the *Corporations Act 2001*, including:

  (i) giving a true and fair view of the Company's and the Group's financial position as at 30 June 2014 and of their performance for the year ended on that date; and

  (ii) complying with Australian Accounting Standards and the Corporations Regulations 2001.

(b) the financial report also complies with International Financial Reporting Standards as disclosed in note 1(a).

Emphasis of Matter

Without modifying our opinion, attention is drawn to note 1(c) in the financial report which indicates that the financial report has been prepared on a going concern basis, which assumes the continuity of normal business activities, the realisation of assets and the settlement of liabilities in the ordinary course of business. In note 1(c), the directors' state why they consider the going concern basis used in the preparation of the financial report is appropriate. As discussed in that note, the assumption of the going concern is dependent on the commercialisation of mineral technologies, equity raisings or joint venturing or sale of interests held in mineral tenements and projects referred to by the directors. This indicates the existence of material uncertainties as to whether the Group will be able to continue as a going concern.

Report on the remuneration report

We have audited the Remuneration Report included in the directors' report for the year ended 30 June 2014. The directors of the Company are responsible for the preparation and presentation of the remuneration report in accordance with Section 300A of the *Corporations Act 2001*. Our responsibility is to express an opinion on the remuneration report, based on our audit conducted in accordance with auditing standards.

Auditor's opinion

In our opinion, the remuneration report of Austpac Resources N.L. for the year ended 30 June 2014, complies with Section 300A of the *Corporations Act 2001*.
